CUISINES

## Vima Design Inc

► Showcases 6 new kitchens

Cuisines Vima Design recently unveiled 6 new kitchens in the J.C. Perreault Kirkland store. This is a fantastic way for the store to showcase its exclusive appliances. Vima Design did not disappoint, they came up with an innovative and very creative way to showoff new J.C. Perreault, top of the line appliances.

The Vima Design Team designed and installed different styles of cabinets, a

variety of counter top surfaces with very trendy ceramic back splashes. All types of appliances from refrigerators, convection microwaves and ovens, cook tops, ventilation hoods, ranges, dishwashers, warming drawers and wine cellars are displayed in Vima's custom cabinets.

Customers in the store have commented on the unique design, craftsmanship and quality installation by Vima Design. "You can tell Vima Design took their mandate seriously" said a Kirkland resident shopping in the store. Another appliance shopper was impressed with the choices in color, door styles, finishes and craftsmanship, she said "Vima really showcases the appliances well, beautiful appliances with beautiful cabinets". When shopping for top of the line appliances in the Kirkland J.C. Perreault store just ask to see the appliances. You won't be disappointed.

Business is going so well for Cuisines Vima Design that they have DOUBLED the size of their Baie D'Urfé showroom. More space, more demonstration kitchens, more counter top selections, more door styles, more spectacular colors and finishes. Thanks to all the references from existing customers, they are busy doing kitchen projects all over the West Island, TMR, Westmount, NDG, the Laurentians, the Eastern townships and even in the Ottawa region.
